(*iii*) *re ; Scarcity of drinking water in some extension area of Belgaum.*

SRI B. B. SAYANAK (Belgaum).—I call the attention of the Minister for Municipal Administration to the hardship caused to the residents of Nanewadi, Chougulwadi and Godsewadi extentions of Belgaum city due to scarcity of drinking water.

SRI H. C. SRIKANTAIAH.—I wish to make the following statement.

Godsewadi and Nanewadi are two small areas within Belgaum city Corporation limited with population of 200 and 500 respectively Inhabitants of these areas have been getting drinking water from open wells. As these areas are far away from the existing distribution system, the Corporation has proposed sinking of a borewell. The site for the borewell has been selected by Geologist. The Corporation has approached the Public Health Engineering Authorities for sparing a rig for sinking the proposed borewell. If the borewell at Godsewadi yields sufficient supply of water, it will be possible to supply water to Chougulewadi also.

2 The inhabitants of Nanewadi are at present getting their drinking water supply from open wells. The Geologist is reported to have advised that it is not feasible to sink a borewell in this area. This area is reported to be surrounded by the Cantonment area. The Corporation has applied to the Military Authorities for tapping drinking water from the distribution system of the Cantonment. The matter is being pursued by the Corporation with the Military Authorities.

3 The matter will also be pursued at Government level in order to ensure that protected water supply is provided to the inhabitants of these areas as early as possible.

SRI B. B. SAYANAK.—The Hon. Minister has given an incorrect figure of population. What is the population of Chougalawadi?

SRI H. C. SRIKANTAIAH.—It may be a thousand.

SRI B. B. SAYANAK.—The Hon. Minister do not know the population.

SRI H. C. SRIKANTAIAH.—If you know it. you please tell me.

SRI B. B. SAYANAK.—If that is the case, you can ask me everything.

SRI H. C. SRIKANTAIAH.—Whatever may be the population the water problem is there; that has to be solved. I have already issued instructions to take up borewell work and provide water immediately population may vary.

SRI B. B. SAYANAK.—In Godsewady the number of Harijans is 500 The depth of the well is more than 200 feet. Is it not a great hardship to ladies draw water from the well? There is no proper water supply for the last 15 years. What is the distance from Godsewady to the distribution contre?

SRI H. C. SRIKANTAIAH.—The distribution system is not there. I have already instructed to make arrangements.

SRI B. B. SAYANAK.—Tilakwadi is near to the Chougalwadi why you are not supplying water from Tilakwadi. Where-as you are supplying water to Mahamaruthi area which is away from the distribution centre.

SRI H. C. SRIKANTAIAH.—That will be examined
